

1. GENERAL

1.1 Scope

- .1 Demonstration of equipment and systems operations.
- .2 Instruction seminars for City's personnel.
- .3 Coordination of training program by UV supplier for the UV system.

1.2 Quality Assurance

- .1 Work specified shall be performed by the Contractor.

2. PRODUCTS

Not applicable.

3. EXECUTION

3.1 General

- .1 Contractor shall arrange for presentation and demonstration of mechanical and process equipment and systems by appropriate specialists and shall ensure that required manufacturer's representatives are in attendance.

3.2 Demonstrations

- .1 Demonstrate specific starting and general maintenance requirements for each major piece of equipment. Ensure all labelling and identification is completed.
- .2 Demonstrate the following systems, in the form of instruction seminars and contractor-guided tour of the facility.

.1 Mechanical Systems

.2 UV Reactors and Related Equipment

For mechanical systems, the Contractor shall include for three (3) separate ½ day training sessions to demonstrate the systems to City staff. The Contractor shall provide his own staff and representatives of the equipment suppliers to conduct the training. The Contractor shall provide a training plan to the Contract Administrator for approval, and shall coordinate the training sessions with the Contract Administrator.

For UV systems, the Contractor shall coordinate the activities of the UV Supplier's training programs. The UV Supplier's obligations for training may be viewed at the office of the Contract Administrator.

- .3 Answer all questions raised by the City at demonstrations; if unable to satisfactorily answer questions immediately, provide written response within three (3) days.
