- E11.1 This specification covers Stone cladding with reference to the design consideration E2. The Work includes cladding the stone, chiselled stone coping on the pillars and cut face stone finish

plaques. Taking out, storing, putting back and adding topsoil between asphalt path and grade beam is considered incidental to this work.

E11.2 Materials

(a) The stone used for cladding should be as follows:

- (i) For Wall- "Northland Stone" manufactured Veneer Stone- Mixture of "Rustic LedgeStone" including corner stones (Approx. 70%) and "Fieldstone" (Approx. 30%). Buff colour. The percentage of the stones is approximate, the Contractor to make sure the final masonry effect of cladding should be as shown on the Drawing Sk-1
- (ii) For Coping- "Northland Stone" manufactured Veneer Stone, chisel finish. The coping 375mm X375 mm shall be formed not more than three stones. Buff colour.
- (iii) For Plaque- "Northland Stone" manufactured Veneer Stone, cut face. The plaque 250 mm X305 mm shall be single piece. Buff colour.
- (iv) Mortar- Type S or type N, "Spec Mix®Stone Veneer Mortar (Scratch & base coat)" or approved equal. For joints use "Spec Mix®Stone Veneer Mortar (Joint Grout)". Use manufacturer's specification Masonry Mortar 04060 Spec Mix®. Mortar Colour: Iron oxide Charcoal pigment colour to be added to the mortar and grout mixes. 8oz of Black iron oxide pigment per 20kg of dry mortar/grout mix.

E11.3 Construction Method

- (a) Do not install in freezing temperatures. Cover and protect if temperatures drop to near freezing.
- (b) Take out the topsoil between asphalt pathway and grade beam. Store it in such a way that it can be reused for planting. Put back the topsoil after the cladding is done. If needed add topsoil to achieve 250 mm depth.
- (c) Install corner units first. Corner units will be used for corners and the top of wall corners. The radii top of wall at the pillars will use corner units as well. The proper mix of these units to produce the desired affect must be discussed with owners and Veneer Stone manufacturer prior to construction to determine acceptable exemplar.
- (d) Placement of Veneer Stone must be staggered to avoid joints lining up and forming an unbroken line, and to avoid forming a plus (+) sign where four units might otherwise meet at the same point. Random appearance is desired as shown on Drawing Sk-1. While installing Veneer Stone select subsequent individual units from multiple pallets in order to get well-blended appearance.
- (e) Mortar Colour: Iron oxide Charcoal pigment colour to be added to the mortar and grout mixes. 8oz of Black iron oxide pigment per 20kg of dry mortar/grout mix. Variation in shading from one mix to another should be minimized by following conditions of initial mix, water content and temperature as closely as possible.
- (f) On a clean concrete surface, apply a 1/2" - 3/4" (1.27 - 19.1 mm) thick application of Stone Veneer Mortar (Scratch & base coat). Before the mortar begins to harden, use a notched trowel to "scratch" the mortar surface. Coat the back of each Stone with sufficient mortar and press it firmly into place until the excess material spreads from the sides of the unit.

- (g) Veneer Stones should be trimmed to allow for best fit. Trim in such away that trimmed edge is located where grout fill will cover the cut or trim line. Joint widths should be between 13mm – 20mm.
- (h) Once all the units are in place, fill a grout bag with Stone Veneer Mortar (Joint grout) and fill each joint by extruding the grout from the bag. The joints can then be tooled, brushed or raked to match the masonry look as shown on Drawing Sk-1
- (i) Grout technique on the vertical will be a standard indented grout finish. Approximately 12mm below stone's face. Grout technique on the top of the wall must be a "Sack Finish" or "Over-grout Finish". Grout will overlap the face of the joint, widening the joint and creating more irregularity. Top of the wall should be rounded slightly to provide complete drainage of water. Grout lines must be worked to slope down to the sides so that there will be no standing water on horizontal surfaces
- (j) Capstone on pillar to be single unit with a flat top with approximate overhangs of 25mm.
- (k) The plaque stone should be placed as shown on the Drawing Sk-1
