Add: E10.3.8 Grass or turf, or other existing facilities between the top of graded bank and the road damaged as part of the Work shall be restored in accordance with applicable City of Winnipeg Standard Construction Specifications.

Replace: E19.2 (c) Stockpiles of material beyond the top of bank will be permitted provided the amount of material and setback distance from the top of bank are such that stability of the riverbank is not compromised. Further to E14.2.5, an inventory of tree species to be removed is not available. Bidders are encouraged to conduct their own inventory of trees to be removed, based on the drawings, and are expected to be familiar with applicable disposal requirements.
