2 NORTHEAST SIGN STRUCTURE ELEVATION  
1 : 20

**GENERAL NOTES:**

**A. WOOD**

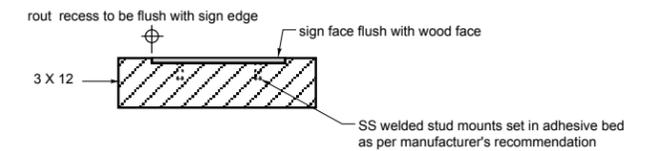

- All exposed lumber except posts to be rough cut fir.
- Preparation for all exposed wood - brush to clean surface.
- All other wood (posts & blocking) to be PT pine.
- Fence posts to be soaked in ACA for all wood below grade and to 150mm above grade.
- All cut ends of PT lumber to be painted with Olympic oil-based clearwater repellant sealant.

**B. SIGNS**

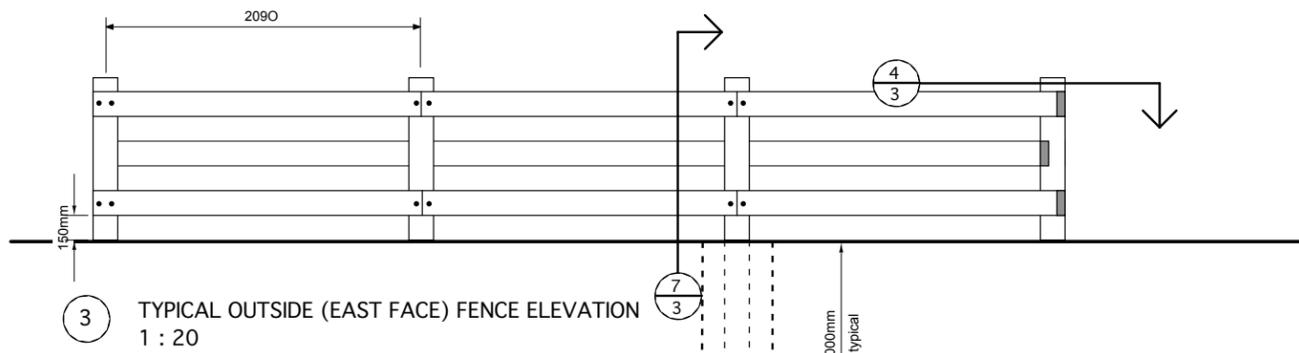

- Letters to be waterjet cut polished clear aluminum, 200mm (8") height x 6.4mm (1/4") depth, c/w 25mm (1") SS studs, available at Gemini Canada Ltd. ([www.signletters.com](http://www.signletters.com))
- Font is "Futura".
- Using templates provided by manufacturer, rout the form of letters in the wood surface, 3.2mm deep, so that once installed, the aluminum letters will be flush with or slightly below the sign surface.
- Fasten as recommended by supplier.

**C. FASTENERS FOR WOOD**

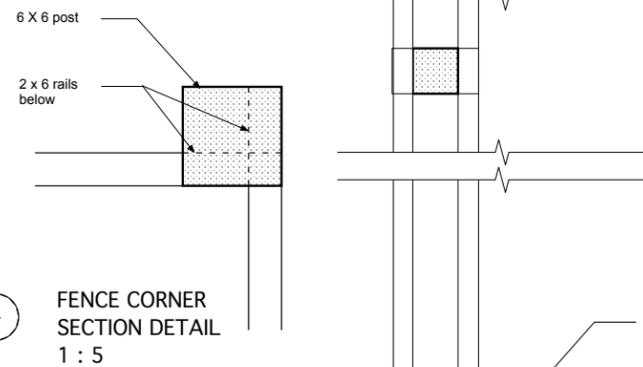

- Hot-dipped galvanized coated fasteners (meet ASTM 153) or stainless steel as recommended by manufacturer of treated wood.
