PART E – SPECIFICATIONS

Add: E13.28

Contractor may utilize existing discharge piping inside the Station for the purpose of connecting and discharging of the temporary by-pass pumping system. Temporary by-pass system piping may be installed and connected downstream of the existing Station discharge valve at a location approved by the Contract Administrator. The Contractor will be responsible for supplying all materials required for the temporary by-pass pumping operations and will also be required to remove and re-install all existing Station discharge piping back to original configuration.
