Questions and Answers

- Q1 Is the WPS open to considering either cloud-based or off-premise products and solutions or the assumption should be that all solutions will be on premise with the WPS Data Centre?
- A1 The solution will be hosted within the WPS Data Centre.
- Q2 Can the WPS provide an estimate or general sense of the size of Data Warehouse that need to be supported?
- A2 2. 5 million to 10 million records (historical) with a growth of 20,000 – 25,000 records per month.
- Q3 How many users do you anticipate for the Business Intelligence capabilities versus the ETL capabilities?
- A3 Business Intelligence – 20 initially and it is expected to grow to 40 users ETL – 5 users.
- Q4 Do you have a time frame in mind by which you hope to have the solution implemented?
- A4 2016
- Q5 Are there any internal infrastructure standards for tools, databases etc. which need to be used?
- A5 SQL Server database and .NET technology are preferred.
- Q6 Do you currently have any geo-spatial and/or mapping solutions which you leverage?
- A6 The WPS uses Intergraph GeoMedia Pro.
- Q7 What is your preferred operating system and also the hardware server modes?
- A7 Windows Server 2012 for the servers, Windows 7 for the workstations, VMWare for virtualization.
