1 INTRODUCTION

A geotechnical investigation was conducted by WSP Canada Inc. for the proposed 2018 Alley Renewals – Local Improvements Project in Winnipeg, Manitoba. The purpose of this investigation was to assess the general subsurface conditions with respect to identifying the existing pavement structure and the underlying soil profile.

Five alleys were drilled, which includes the following alleys:

- A. Alleys bounded by Dumoulin St and Notre Dame St, Archibald St and La Fleche St
- B. North/south alley between Lawndale Ave and Ferndale Ave from Highfield St to Coniston St
- C. Alleys bounded by Tache Ave and Crawford Ave, Coniston St and Lyndale Dr
- D. Alleys bounded by Lloyd St and Gauvin St, Coniston St and Lyndale Dr
- E. Alleys bounded by Bronstone Blvd, West Ferndale Ave and St. Mary's Rd

2 SUB-SURFACE INVESTIGATION AND TESTING

The field investigation was undertaken on February 15, 2018 and was completed on February 16, 2018. A total of 15 test holes were completed by Maple Leaf Drilling. The test holes were drilled to a depth of 3.05 m below the road surface using a truck-mounted CME 55 rig equipped with a 125 mm auger, as well as a truck-mounted B-40 rig also equipped with a 125 mm auger. All test holes were backfilled with auger cuttings and bentonite after the completion of the drilling. Testhole locations are noted on the testhole logs and within the test hole summary tables.

The soils encountered were visually classified to the full extent of the test hole. Representative soil samples were recovered at regular intervals, every 0.3 m to 2.1 m as well as one sample at 3.0 m. All of the soil samples were tested for their moisture contents and selected soil samples were submitted for grain size analysis (minimum one per alley). No groundwater seepage or sloughing was encountered in the test holes during drilling.

Detailed descriptions of the soil profiles for each test hole are included on the logs in Appendix A. The material test results are included in Appendix B. The locations of the testholes are included in Appendix C.

3 TESTHOLE SUMMARY TABLES

Table 3-1 - Dumoulin/Notre Dame Alley

TEST HOLE NO.	TESTHOLE LOCATION	PAVEMENT SURFACE		SOIL DESCRIPTION	BOREHOLE DEPTH (m)	No. of Samples Taken

4 CLOSURE

The findings and recommendations provided in this report were prepared by WSP Canada Inc. (the Consultant) in accordance with generally accepted professional engineering principles and practices. The recommendations are based on the results of field and laboratory investigations and are reflective only of the actual test hole(s) and/or excavation(s) examined. If conditions encountered during construction appear to be different than those shown by the test hole(s) and/or excavation(s) at this site, the Consultant should be notified immediately in order that the recommendations can be reviewed and modified as necessary to address actual site conditions.

This report is limited in scope to only those items that are specifically referenced in this report. There may be existing conditions that were not recorded in this report. Such conditions were not apparent to the Consultant due to the limitations imposed by the scope of work. The Consultant, therefore, accepts no liability for any costs incurred by the Client for subsequent discovery, manifestation or rectification of such conditions.

This report is intended solely for the Client named as a general indication of the visible or reported physical condition of the items addressed in the report at the time of the geotechnical investigation. The material in this report reflects the Consultant's best judgment in light of the information available to it at the time of preparation.

This report and the information and data contained herein are to be treated as confidential and may be used only by the Client and its officers and employees in relation to the specific project that it was prepared for. Any use a third party makes of this report, or any reliance on or decisions to be made based on it, are the responsibility of such third parties. The Consultant accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report.

The report has been written to be read in its entirety, do not use any part of this report as a separate entity.

All files, notes, source data, test results and master files are retained by the Consultant and remain the property of the Consultant.
