---

**Please note the following and attached changes, corrections, additions, deletions, information and/or instructions in connection with the Tender, and be governed accordingly. Failure to acknowledge receipt of this Addendum in Paragraph 10 of Form A: Bid may render your Bid non-responsive.**

---

#### **QUESTIONS AND ANSWERS**

- Q1: Clarification as to the alteration of the height of the brick at the high low wall at the base of the hose tower and the remaining high low wall between the flat roofs.
- A1: - the brick on the hose tower is going to be removed and raised to be above the top of the finished roof
- the masonry work for the brick veneer alteration on the east and west faces of the hose tower will be completed by the City of Winnipeg
  - the slope of the roof A1 will be increased to 2%. This will require build up of the parapets around the low roof area of approximately 1.5" to accommodate the change to 2% slope from 1.5% slope. This will be in addition to any additional parapet build up as designed.
  - the remaining high low wall connections will be as detailed in drawing A5-R1
