D2. SCOPE OF SERVICES

D2.1 This project is intended to set the stage for a future preliminary design study by identifying constraints and opportunities within the transportation network in and around Downtown Winnipeg. The Services will consist generally of an iterative process of developing, analyzing, refining, and short-listing various network, segment, and intersection alternatives related to incorporating rapid transit infrastructure within or near existing rights-of-way. Short-listed alternatives will be referred to the future Rapid Transit (Downtown Corridors) Preliminary Design study for subsequent analysis, engagement, and reporting.

Scenarios are expected to include geometric changes, lane designation changes, changes to signal phasing and timing, and any other physical or operational change identified during the study process.
- (ii) The general location of analysis will be on the Priority One corridors as identified within the Winnipeg Transit Master Plan, illustrated in Appendix A, and may include other streets and intersections impacted by diverted traffic flow or integrated multi-modal accommodations.
- (iii) Network options development should be informed by approved Council plans and policies, along with feedback obtained through public engagement in other ongoing projects, including CentrePlan 2050.

Several options at any specific location are expected.
- (v) Analysis priorities should be determined through discussion with the Working Group. Proponents should describe an approach to identify work required, and prioritize the work to fit the project budget.
- (vi) Proponents should describe their approach to and experience with traffic analysis and micro-simulation within a constrained, city-centre environment with heavy pedestrian, vehicular, bicyclist, and transit presence.
