### Social Procurement Questionnaire

*Version 2.0 March 2024*

Every purchase has an economic, social, environmental, and cultural impact. Sustainable Procurement is about capturing the economic, social, environmental and cultural impacts of purchasing decisions to foster healthy and vibrant communities.

Historically, procurement has been about choosing the supplier offering the lowest price while still meeting technical requirements of providing high quality products or services with minimal risk. By expanding the premise of 'best value' in procurement, to include the generation of positive societal benefits, alongside high quality and competitive proposals, the City of Winnipeg is working to maximize community benefits and deliver improved socio-economic returns for stakeholders, within the existing spend.

The key economic and social goals that the Social Procurement Questionnaire will ask questions about are:

- Increase employment of First Nations, Inuit and Red River Métis peoples
- Increase employment of Equity Groups
- Increase in organizations paying a Living Wage
- Increase training and apprenticeship opportunities for Equity Groups, including First Nations, Inuit and Red River Métis peoples
- Increase contract and subcontracts with social enterprises, Indigenous businesses and diverse businesses
- Enhance City of Winnipeg knowledge of public and private employment training entities and increase partnerships between contractors and these entities
- Align public and private education and training programs with potential employment through sustainable procurement
- Suppliers are recognized for and increase their contributions to the advancement of the Winnipeg community socially, economically, culturally and environmentally
