QUESTIONS AND ANSWERS

Q1. How will the city be handling noncompliant contractors? Will there be more frequency of inspections on equipment and operators? How can we ensure our equipment is hired to work at the city specifications?

A1. CONTROL OF WORK in Section D of the Tender outlines everything required. The frequency of inspections will be at the sole discretion of the Contract Administrator and no timetable will be set. Contractors shall keep their equipment within specification at all times while operating within City right-of-way when working for the City.
